Rita Santos

Software engineer and tech lead with professional experience building distributed systems, event-driven architectures, and backend microservices.

PROFESSIONAL EXPERIENCE

Staff Software Engineer / Tech Lead
CloudScale | 2021-Present (3 years)

- Leading system architecture for event-driven backend services and API platforms.
- Re-architecting monolithic services into microservices using Go, Python, and Apache Kafka.
- Mentoring engineers on code quality and technical design.
- Managing AWS cloud infrastructure and containerized deployments using Docker and Kubernetes.

Senior Backend Engineer
FinTech Global | 2018-2020 (3 years)

- Developing REST and gRPC microservices in Go and Python.
- PostgreSQL database schema design and query optimization.

EDUCATION

M.Sc. in Informatics and Computing Engineering
FEUP (2010-2015)

TECHNICAL SKILLS

Languages: Go, Python, SQL, Bash
Architecture & Systems: Microservices, Apache Kafka, RabbitMQ, PostgreSQL, Redis
Cloud & Tools: AWS, Docker, Kubernetes, Terraform, Git
