PROFESSIONAL SUMMARY

Backend Software Engineer with 3.5 years of professional experience specializing in Python (FastAPI, Django), building high-throughput RESTful APIs and asynchronous microservices, and leading PostgreSQL optimization and Redis caching.

PROFESSIONAL EXPERIENCE

Backend Software Engineer 2021-Present
CloudScale · Porto, Portugal

- Developing high-throughput RESTful APIs and asynchronous microservices in Python using FastAPI and Django.
- Leading PostgreSQL schema design, indexing, and comprehensive query optimization.
- Implementing Docker and Docker Compose containerization for standardized development and staging workflows.
- Integrating RabbitMQ message brokers and Celery for asynchronous task queues and microservice communication.
- Implementing Redis caching layers and writing robust unit and integration test suites using pytest.

Junior Web Developer Sep 2020 - Dec 2020
SoftPorto Solutions · Porto, Portugal

- Maintained internal CRM portals and backend workflows using Python and Django.
- Assisted in database management and version control workflows using Git.

EDUCATION

B.Sc. in Informatics and Computing Engineering 2017-2020
FEUP · Porto, Portugal · 14/20

SKILLS & COMPETENCIES

Languages & Frameworks: Python, FastAPI, Django, Flask

Databases & Infrastructure: PostgreSQL, Redis, Docker, Docker Compose, RabbitMQ, Celery, AWS (S3, EC2, RDS), Linux

Testing & Tools: pytest, Git, GitHub Actions

LANGUAGES

Portuguese: Native (Native speaker)

English: C1 (Full Professional Proficiency)

PROJECTS

Distributed Key-Value Store (2020): Built a resilient distributed key-value store in Python and C++ featuring replication, fault tolerance, and consensus algorithms (FEUP Academic Project).

Hospital RDBMS Project (2020): Designed and implemented a relational database management system for hospital operations, optimizing complex SQL queries and indexing strategies.

I consent to the processing of my personal data for recruitment purposes, in accordance with the GDPR (Regulation (EU) 2016/679).
