PROFESSIONAL SUMMARY

Backend Software Engineer with over 3 years of professional experience designing RESTful APIs, high-throughput microservices, and robust relational databases using Python and PostgreSQL, achieving proven performance optimizations such as a 38% reduction in p95 query latency.

PROFESSIONAL EXPERIENCE

Backend Software Engineer 2021-Present
CloudScale · Porto, Portugal

- Designed and maintained 12+ REST microservices serving over 800 requests per second using Python, FastAPI, and Django.
- Led PostgreSQL schema design and comprehensive query optimization, reducing p95 latency by 38% and decreasing database load by 45% via Redis caching.
- Implemented Docker containerization for standardized deployment environments.
- Integrating RabbitMQ message brokers to handle asynchronous tasks and microservice communication.

EDUCATION

B.Sc. in Informatics and Computing Engineering 2017-2020
FEUP · Porto, Portugal · 14/20

SKILLS & COMPETENCIES

Languages & Frameworks: Python, FastAPI, Django

Databases & Infrastructure: PostgreSQL, Redis, Docker, RabbitMQ, Linux

Tools & Platforms: Git, GitHub

LANGUAGES

Portuguese: Native (Native proficiency)

English: C1 (Full Professional Proficiency)

PROJECTS

Distributed Key-Value Store (2017-2020): Developed a Distributed Key-Value Store using Python and C++ focusing on replication and fault tolerance as part of academic coursework at FEUP.

Hospital RDBMS Project (2017-2020): Built a relational database project for a hospital system as part of academic coursework at FEUP.

I consent to the processing of my personal data for recruitment purposes, in accordance with the GDPR (Regulation (EU) 2016/679).
