PROFESSIONAL SUMMARY

Cloud & DevOps Engineer with 3+ years of professional backend experience building and deploying scalable microservices in Python. Leveraged verified core skills in Docker, GitHub Actions CI/CD pipelines, and Linux systems administration to optimize cloud infrastructure workflows. Delivered high-availability RESTful APIs and optimized PostgreSQL database operations at CloudScale.

PROFESSIONAL EXPERIENCE

Backend Software Engineer January 2021 – Present
CloudScale · Porto, Portugal

- Developed and deployed RESTful APIs in Python using FastAPI and Django.
- Managed PostgreSQL schema design and comprehensive database query optimization.
- Implemented Docker containerization and configured GitHub Actions CI/CD pipelines for standardized deployment environments.
- Integrated RabbitMQ message brokers to handle asynchronous tasks and microservice communication.

Junior Web Developer September 2020 – December 2020
SoftPorto Solutions · Porto, Portugal

- Built and maintained Python backend web components and supported database integrations.

EDUCATION

B.Sc. in Informatics and Computing Engineering September 2017 – July 2020
FEUP · Porto, Portugal · 14/20

SKILLS & COMPETENCIES

Languages & Frameworks: Python, FastAPI, Django

Cloud & Infrastructure: AWS (S3, EC2, RDS integrations), Docker, Linux, PostgreSQL, Redis, RabbitMQ

CI/CD & Tools: GitHub Actions, Git

LANGUAGES

Portuguese: Native

English: C1 Full Professional

PROJECTS

Distributed Key-Value Store (2020): Developed a fault-tolerant distributed key-value store using Python and C++ focusing on replication and fault tolerance.

Hospital RDBMS (2019 - 2020): Designed and implemented a relational database management system for hospital record operations.

I consent to the processing of my personal data for recruitment purposes, in accordance with the GDPR (Regulation (EU) 2016/679).
