PROFESSIONAL SUMMARY

Computer Science graduate and Data Scientist Intern candidate with a 15/20 B.Sc. degree from the University of Coimbra. Expert in Python, SQL, and Scikit-Learn with proven academic and practical experience in building data pipelines, predictive models, and customer churn analysis.

PROFESSIONAL EXPERIENCE

Curricular Summer Internship July–September 2023
SoftInov Soluções Tecnológicas · Portugal

- Focused on automating unit and integration testing with pytest, writing SQL queries, and handling PostgreSQL database migrations.
- Gained practical experience in QA methodologies, database management, and team collaboration.

EDUCATION

B.Sc. in Computer Science 2021-2024
University of Coimbra · Coimbra, Portugal · Grade: 15/20 (Thesis Grade: 17/20)

SKILLS & COMPETENCIES

Programming Languages & Tools: Python, SQL, Git, PostgreSQL

Libraries & Concepts: Pandas, NumPy, Scikit-Learn, Statistics, Probability, Quantitative Analysis, Machine Learning Model Evaluation, Unit Testing

LANGUAGES

Portuguese: Native

English: C1 Advanced · Cambridge Certificate

PROJECTS

Capstone Project: Customer Churn Analysis (2024): Built a robust data pipeline in Python analyzing customer churn and retention using 80k+ user records with Pandas, Scikit-Learn (Random Forest/XGBoost), and PostgreSQL.

E-Commerce Cohort & Sales SQL Analyzer (2023): Developed analytical queries and Python scripts to extract customer retention cohorts and monitor sales KPIs.

Mini Inverted-Index Search Engine (2023): Implemented a keyword search and retrieval prototype in Python demonstrating data indexing and evaluation metrics.

I consent to the processing of my personal data for recruitment purposes, in accordance with the GDPR (Regulation (EU) 2016/679).
